Page loading speed ✔️

» *Page URL Speed* ✔

This page took around **0.49** seconds to load (very fast).
   The page loading speed is important for several reasons :
   1. Google and all the search engines love the pages that are loading fast because slow loading pages will reduce their scanning speed, this is the main reason why google will temporarily affect rankings of low speed websites.
   2. If your website/page loads slowly your visitors will not visit many pages and in most cases will press the back button in the browser before the page will fully load, which will cause lower traffic and high bounce rate which will affect rankings.

File robots.txt ✔️

» *Your robots.txt file* ✔️

Your **robots.txt** file was found in your website and it is valid, this is good, google will index your site correctly.
